

## An Australian Government Initiative

### Chemicals of Security Concern

A large and diverse number of industrial, agricultural and veterinary chemicals are legitimately used by individuals and organisations every day throughout Australia. However, some of these chemicals have been diverted from their lawful use for other purposes, including terrorist related activity. The Council of Australian Governments (COAG) has identified 96 chemicals that require priority risk assessment. These are set out in the list below which is entitled 'Chemicals of Security Concern'.

Australian governments and industry are now working together to minimise the risks associated with unlawful use of these chemicals to ensure public safety and national security. The current security environment is dynamic and it is vital to the safety of all Australians that persons involved in the manufacture, importation, transportation, sale and use of chemicals report any unusual behaviour regarding the sale and/or use of chemicals to the National Security Hotline on 1800 123 400.

#### *Disclaimer:*

This list of Chemicals of Security Concern (**the List**) is provided for general information only. While persons involved in the manufacture, importation, transportation, sale and use of chemicals and the general public may refer to the List to assist them with security considerations or the reporting of unusual sales or use of the chemicals identified, the List is provided on the understanding that it does not constitute advice.

The List may be subject to change from time to time and will contain information that has been obtained from other sources. It is therefore provided on an 'as is' basis and may not be accurate, current, reliable or complete.

The List does not indicate any future policy approach or a commitment to a particular course of action on the part of the Australian Government.

You should seek your own independent advice before relying on the List. The Australian Government is not liable for any loss resulting from any action taken or reliance made by you on the information provided.
